

In the name of Almighty Allah, The most Beneficent, The most Merciful.

I am happy to write this message for our valued customers, well wishers and financial supporters a profile of our companies and our products. It is their sincere cooperation and support that has helped us to embark on large scale and diversified steel manufacturing works through the most modern and fully automated steel making and re-rolling facilities in our industrial complex. Technical collaboration with TATA Steel of India and Florida Steel of USA our company has upgraded its production capacity to emerge as one of the leading steel manufacturer in the country. I am thankful to these organizations for their support and service. I deeply appreciate and place on record the hard work and dedication of our work force at all levels.

At this moment I also remember those who worked with us and inspired us to grow but are no more in this world. I pray for them. I pray for salvation of their departed soul. May their soul rest in peace.

I consider our success in manufacturing quality steel products and merchandising them as “ a shared success” – shared with our dedicated work force and shared with our valued customers and well wishers.

We believe in dynamism. We are sensitive and responsive to the changing need of time. We plan our future on the experience on the past. We like to work and the present is vital for us.

We are committed to total quality products through our untiring and honest effort adopting methods based on the modern science, concept and technology. Our commitment to quality products is for the present and for time to come.

We are determined to go ahead with our mission and meet the emerging need and challenge of the new millennium with courage and confidence.

May Almighty Allah help us and crown our mission with success.

Haji Abdur Rahim
